

典型的类适配器代码

```
public class Adapter extends Adaptee implements Target{  
    public void request(){  
        specificRequest();  
    }  
}
```

典型的对象适配器代码

```
public class Adapter extends Target{  
    private Adaptee adaptee;  
  
    public Adapter(Adaptee adaptee){  
        this.adaptee = adaptee;  
    }  
  
    public void request(){  
        adaptee.specificRequest();  
    }  
}
```
